

# H-2501

## Standard Bottom Center Pivot

### Description

- Frame portion (with or without threshold): Extruded machined aluminum with adjustable pin.
- Threshold portion: Ball bearing, adjustable pivot pin.
- Without threshold: Stainless steel pivot pin; not adjustable in the pivot housing.
- Door portion: Steel clamping bolt threaded into cast aluminum pivot block.

### Application

- Entrances with thresholds: Pivot is anchored to frame and threshold. This frame portion has an adjustable pin for proper door and frame clearance.
- Entrances without thresholds: Frame portion is securely fastened to frame and directly to floor.
- Use top and bottom center pivots with surface mounted closer or bottom pivot only with concealed overhead closer.

### Usage

20D/35D/50D and 40M/50M
