

P-54453

Standard Rim Panic Exit Device

Hardware Description

- Rim Panic Device has latch bolt in rim of active housing engaging adjustable roller strike to provide locking action.
- Depressing touchpad “unlocks” the device and permits egress. The bolt re-engages the strike and locks when the door closes.
- On single doors, adjustable strike is mounted on frame lockjamb. Adjustable strike is part of removable mullion required for door pairs.
- Panic device can be deactivated “dogged” with cylinder key or allen key. Keyed alike cylinders are optional.
- Rim cylinder diameter of 1-5/32” (29.4mm); cylinder specified above.

Vendor of Hardware

First Choice Building Products

Vendor Part Number

3700 Series - 379036

Application

- Depressing touchpad permits egress from building without key.
- Removable mullion is required on pairs of doors. Using optional mullion stabilizers is recommended.
- Touchpad design offers increased building security and reduces the risk of code infringements.
