#### **Project Estimation**

Create estimates, maximize your profits, and win more jobs using our easy estimating tools.

#### **Preliminary Structural Design**

Analyze the system's ability to withstand design pressures and identify members requiring reinforcement.

### **Shop Drawings**

Saves time by automating the creation of shop drawings, including dimensioned elevations and section cuts.

#### **Material Optimization / Take-off**

Quickly prepare material orders and cut lists to make sure you're getting the most out of your resources and budget for every project.

#### **Fabrication Utilities**

Streamline material flow within the shop and keep material organized with accurate production information.

Ycalc X5 can be purchased and updated through Orgadata USA. **To learn more, visit www.ykkap.com/YcalcX5, or call Orgadata USA at 1-800-746-0641**
