

HAVE A UNIQUE PROJECT CONDITION?

YKK AP's Engineering Team
is available to assist customers
at every stage of your project.

WHAT WE DO

Work with customers and architects
to understand the project scope

Perform structural calculations and determine
the best approach to solve facade challenges

Provide benefit analysis for alternative
approaches through value engineering

Develop concepts and proposal drawings
of qualified solutions

Conduct thermal or blast analysis, if required

THE RESULT

We modify our systems to create a customized
solution designed specifically for your project.

INTERESTED?

Let us show you more! We'd love to share a few real world examples of some problems we've helped
our customers solve. Ask your sales representative to schedule an in-person or online introduction.
