Highest Quality Aluminum Billets and Extrusions

YKK AP controls every step in the manufacturing process under one roof. To ensure the quality and the integrity of the aluminum alloy we cast our own aluminum logs for extrusion at our ISO 14001 certified facility located in Dublin, Georgia. These logs include a minimum of 30% pre-consumer recycled aluminum content.

Duranar® Coatings Advantage

With a proven track record of over 40 years, Duranar coatings are formulated with 70% PVDF fluoropolymer resin and proprietary PPG resin, pigments and solvents. This gives Duranar coatings durability and colorfastness unmatched in the industry.

Chemical Conversion Coating

PPG's pretreatment is recognized as the most effective pretreatment for aluminum providing the maximum corrosion protection available. Outstanding surface preparation is the key to achieving AAMA 2605 performance, the most stringent paint performance standard in the industry.

Superior Painted Finishes Meet AAMA 2605

The 70% PVDF (Duranar®) two-coat, non-exotic, non-metallic color samples shown on the front are the actual colors and may be used as a reference. Countless additional paint colors are available to customize your design. Additional colors and finishes are also available. Contact your local sales office for pricing and lead time information. We also have AAMA 2604 high quality color finishes that can work for interiors.
