

YCW 750 XT Advanced Thermal Performing

Outside Glazed Curtain Wall System

The **YCW 750 XT** yields best-in-class thermal performance and exceeds the most stringent green building codes and standards in the market today. This system utilizes MegaTherm[®] technology with structural polyamide struts that accommodate standard glazing units as well as advanced glazing options. To ensure long-term structural integrity, the deadload of the glass rests on integrated structural supports, diverting this load away from the thermal barriers.

- Integrates with a building's air-vapor barrier system
- Dual finish capability for different exterior and interior colors
- Optional intergreal thermally broken sill flashing available
- Designed to support glazing up to 2-1/4"
- Integrates with our YKK AP Entrances
 and Sun Control Systems

Configuration:

Glazing	Glass Setting	Installation
Outside	Front Set	Shear Block

Thermal Values:

U-Factor:	Values as low as 0.17*	
CRF: N	linimum 78 frame and 67 glass	

*Based on AAMA 507. Lower values may be achieved through further simulation.

A Closer Look at our Thermal System

- Carry dead load of the insulating glass, diverting load away from struts
- **OPTIONAL INTEGRAL SILL FLASHING** Diverts internally drained water away from adjacent components at sill

OPTIONAL BRAKE METAL INTERFACE Allows flashing to extend further from the building at the sill
